LinkRunner® AT 4000

Smart Network & Cable Tester

The LinkRunner AT 4000 is a cutting-edge network cable tester for modern networking tasks and infrastructural diagnostics. Designed for network engineers requiring a robust toolset for both fiber and Multigigabit Ethernet environments, it offers:

- Advanced network discovery and topology mapping.
- Comprehensive diagnostics and troubleshooting features, enhancing network visibility and operational efficiency.
- A robust set of automated tests for precise network validation and troubleshooting, ensuring seamless moves, adds, and changes.
