Tekniset tiedot

AirMagnet Planner
Wi-Fi Network Planning Tool
Key Features
- Plan and design Wi-Fi networks (802.11a/b/g/n/ac/ax) without physically rolling out any APs
- Optimize AP count and layout for maximized coverage and performance by modeling building construction materials/ obstructions and AP placement
- Reduce time spent planning by quickly importing walls from CAD drawings
• Estimate Wi-Fi deployment budgets; generate installer-ready BOM reports
- Plan migration strategies as new users or technologies are introduced
