Tekniset tiedot

NEOCLEAN-MMC is an optical connector cleaner specifically designed for MMC connectors.
Its unique guide structure and cleaning mechanism ensure stable contact and reliable end-face cleaning, even in narrow-pitch structures.
Designed specifically for MMC connectors.
Designed for MMC connectors with narrow pitches and diverse shapes, it ensures stable contact with the ferrule end face, enabling thorough cleaning.
A unique guide structure prevents misalignment.
Our unique guide structure prevents misalignment and poor contact during cleaning, ensuring consistent cleaning quality regardless of the operator's skill level.
Low dust generation and uniform cleaning power
Inheriting the proven low-dust design and uniform cleaning mechanism of the MPO cleaner "NEOCLEAN-M," this cleaner ensures reliable cleaning while suppressing contamination buildup on the edges.
