Indoor Gigabit 30W/60W/90W

Tuote

Tuotekoodi: E59-101

Tekniset tiedot

The E59 series, a small form factor, is an ideal for indoor environments where two units of E59 series can be daisy-chain to prolong range of PoE devices such as PoE cameras, wireless APs reaching up to 300m from end to end or up to 500m by star topology. No power adapter required, E59 PoE extender is powered by PoE injector, middle-span Hub, or PoE switch over one networking cable extending Ethernet range depending on PD's power consumptions and PSE's power budget per port.
