Tuotekoodi: FTB-2-PRO-S1

### Tekniset tiedot

#### Description

The FTB-2 Pro is the most compact solution on the market for multirate, multitechnology, multiservice testing, delivering all the power of a high-end platform in a conveniently sized, go-anywhere field-testing tool.

Nowadays, with the complexity and extent of modern networks, technicians need more than a few tools in their belt to get the job done right the first time. They need OSAs, Ethernet multiservice modules and OTDRs with fiber inspection probes. You name it, the technician needs it. But what makes the supertech "super" is the ability to drill down effortlessly and perform all tests quickly and accurately, cutting costs and saving time. That's the added value, and that's one of the many advantages that the FTB-2-Pro brings to the table.

The FTB-2 Pro is by far the smallest, most compact high speed multitechnology test platform out there. The FTB-2 Pro offers the most versatility: This is your go-anywhere, test-anything platform.

Designed for applications such as:

- Fiber characterization
- Gigabit/10G Ethernet configurations
- ROADM commissioning
- Multiservice transport testing
- 100G testing
