Tekniset tiedot

EXFO is very excited to launch the FTB Lite OTDR Series our new always-connected OTDRs designed to solve common issues, such as lack of compliance and expertise, inefficient processes, and delays in getting the latest updates.
Always-on connectivity provides:
1. Automated validation and seamless compliance: Automated job tracking and reporting in real time confirm MoP adherence, ensure compliance with testing standards while reducing errors and administrative work.
2. Enhanced collaboration and efficiency: Real-time data sharing, automated uploads, and cloud-based reporting enable teamwork while accelerating decision-making and project timelines.
3. Actionable insights: Automated access to comprehensive live data to perform analytics and extract insights, enabling informed decision-making and planning.
