Cost-effective Solution for RS232/422/485 Serial-to-Ethernet Application

PLANET ICS-115A Serial Device Server is specially designed to convert RS232, RS422 or RS485 serial communication to Fast Ethernet networking to extend the network distance efficiently and inexpensively.

There is one 100BASE-FX single-mode/multi-mode media available in the ICS-115A and its operating temperature ranges from -10 to 60 degrees C for your network needs. The ICS-115A is a time-saving and cost-effective solution for users and system integrators to quickly transform their serial devices into the Ethernet network with no need of replacing the existing serial devices and software system.
