

Injection Transformer 10 Hz-

Tuote

Tuotekoodi: J2101A

Tekniset tiedot

Key Features:

- 10 Hz supports off-line power supplies
- 45 MHz high enough for even state of the art regulators
- 23 Octave range
- Low distortion for superior precision
- 5 Ohm termination for minimum impact to loop
- Includes attenuation to assure small signal measurement
- for oscilloscopes and Spectrum Analyzers.
