

## Current Injector

---

### Tuote

Tuotekoodi: J2111B

### Tekniset tiedot

#### Key Features:

- High PSRR Low Noise Regulator with Universal input
- Output Current Variation (Controllable) - 50mA
- Total Output Current Variation (Controllable+Bias) - 74mA
- 20nSec typ rise and fall time
- DC-40MHz usable range (interconnection dependent)
- Two Quadrant Bipolar operation works with positive or negative source
- Built in offset for use with Network Analyzer
- Precision current monitor with 50 Ohm output
- Works with AWG, Function generator and network analyzer
- Can be used to measure battery impedance. Just for you.
