

## Westermo Fibre converter

---

### Tuote

Tuotekoodi: ODW-730-F2

### Tekniset tiedot

#### Yhteenveto

The ODW-730-F2 has been designed to allow the use of fibre optic cables on RS-422/485 networks. The design allows the use of a range of Westermo verified SFP (Small Form Pluggable) transceivers which can provide solutions with, for example, only a single fibre or distances up to 120 km. Both multidrop networks and redundant rings can be formed using a mixture of transceiver types.
