High Performance Gigabit Ethernet over Coaxial Solution
To fulfill the needs of long distance and higher speed required Ethernet over
Coaxial applications, PLANET Technology offers a new-generation Ethernet over
Coaxial Converter, VC-232G. It features 1 10/100/1000BASE-T RJ45 port and 1
BNC female connector with a compact-sized metal housing, making the placement
of the unit convenient. Working well with a pervasive coaxial network, the VC-232G
provides an excellent bandwidth of up to a total duplex data rate of 300Mbps
which can extend a maximum distance up to 1.4km. It is ideal for extending the
distance and signal conversion by transmitting the Ethernet data from the coaxial
cable to another 100-meter UTP cable for any type of IP network device such as
HD IP camera, wireless access point, NVR and digital signage.
