NetAlly WIREVIEW 2-6 Wireview Wire Mappers No. 2 Thru 6
Features And Specifications
Adapters are compatible with LinkRunner AT 1000/2000/3000/4000 models
The NetAlly WIREVIEW 2-6 is a set of wiremap adapters and cable identifiers designed to assist the basic cable test features of the LinkRunner AT network cable testers. When testers are terminated with a WireView Cable ID Adapter, you can identify the following: Cable length, Normal or negative pair-wise polarity (e.g. pins 1, 2 connected to pins 2, 1), Crossover cables, Shorts, Opens, Split pairs and Reversed pairs.
